<sup>TM\*</sup> Power Plus brand seed corn is distributed by Burrus  
<sup>1</sup> Value: Priced hybrids are sold on a no return, first-come first-served basis.  
<sup>2</sup> Grain Channelling is still required on this hybrid, but the channelling forms do not have to be executed any more.  
 If seed is available with PS seed treatment and it was originally planted with PS the seed is 100% free when replant is needed. The same is true with BX or Burrus Xtra (Poncho 500)  
 E-Z Load boxes are charged out at \$600 each and credited back at \$600 if they are returned in good condition. BX3 & PX3 will contain 60 units per E-Z Load box. BX4, PX4 & HP4 will contain 50 units, and BX5, BX6, & PX5, PX6 will contain 40 units and BX7 & PX7 will contain 35 units per E-Z Load box. Seed shipped in E-Z-load boxes can be returned if the seal is not broken. If the customer order does not fit exactly within the unit guidelines for the E-Z Load box, the additional units will be supplied in 80M unit bags.  
 PowerShield seed treatment is Poncho or Cruiser 250

The Go areas in red, have limited supply. Please contact your DSM/RSM for the quantity available for your dealership
