Recommended Refuge Choices

Stacked Base hybrid 80%: 5566GT3
 Refuge 20%: 5R65R™* brand
 Other good refuge choices:
 6B51 R™* brand, 591L

Refuge choices always should have a granular insecticide or High rate Poncho® (1250) in the area where the corn rootworm variant exists.

LIBERTY LINK Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Ignite® herbicide for optimum yield and excellent weed control.

Corn talk meetings a staple at Burrus

How many companies provide an open forum where growers ask corn growing questions rather than hear a canned sales presentation? Come join us at an agronomic “Corn Talk” meeting near you. Contact your Burrus RSM to find out when and where you can learn honest, upfront answers to your corn-growing questions that will help make your operation more profitable.

- Agrisure 3000GT technology makes 5566GT3 a quad stack
- Lots of top end yields from medium sized plants
- Great agronomics with good test weight and fall appearance
- Prefers higher populations on your better soils
