The Color of Profit

We offer products with the traditional refuge requirements of 80% technology and 20% herbicide only or non-GM product protected with granular insecticides. We have shown a color-coded system to indicate which refuge system is needed for the various products to protect the technology and the environment.

For additional reference of any refuge advice, consult www.refugecalculator.com. It will compute the number of units for each field as well as all approved planting configurations.
