Strike a blow for LibertyLink®!

New full season soybeans with LibertyLink® gene now available! Roundup resistant weeds are showing up in several areas. We recommend rotation of chemicals to avoid or cope with them. Many of our corn products carry the Ignite® resistance, and now we are offering two soybean varieties with the LibertyLink gene at the 3.7 and 4.1 maturities to allow growers the choice of alternating chemical programs in any crop rotation system. These new Liberty.Link soybeans will carry the Hoblit® brand name. Order while supply lasts.

GREEN - All soil types
YELLOW - Product may not be appropriate for all environments - Place on more productive soils
RED - Not recommended
