

## You don't need to change your glasses!

When the refuge is blended in the bag, you will see a small percentage of purple seeds scattered throughout the red treated seeds. This just serves as a reminder that the seed is blended. The Optimum® AcreMax® 1 system uses the same genetic platform for both components, so there is no antagonism of plant height, population or grain quality.

**GREEN** - All soil types  
**YELLOW** - Product may not be appropriate for all environments - Place on more productive soils  
**RED** - Not recommended

### General Characteristics

Relative days to maturity: 114  
Plant height: 8  
Ear height: 8  
Ear type: Inter  
Drought tolerance: 8  
Greensnap tolerance: 7

### Planting Information Rates

Adapt to no-till: 9	
Speed of emergence: 8	
High organic soils: 10	31 – 35
Timber soils: 9	27 – 31
Clay & varied soils: 9	27 – 31
Wet soils: 7	
Sand (dryland): 9	23 – 27
Sand (irrigated): 10	31 – 35

### Refuge Requirements

7P44AM™\* Brand

**No separate refuge needed**

### Strengths and Weaknesses

Plant growth regulator sensitivity: NA  
General stay green: 9  
No. leaf blight tolerance: 6  
So. leaf blight tolerance: NA  
Anthracnose tolerance: 6  
Gray leaf spot tolerance: 7  
Diplodia ear rot tolerance: 7

### Harvest Information

Grain quality: 10  
Test weight: 9  
Growing Degree days to Silk: NA  
Growing Degree Days to 30%: NA  
Growing Degree Days to 20%: NA  
Dry down rate: 7  
Ear retention: 8  
High tonnage silage: 10  
Harvest residue: 10

If not Optimum®AcreMax® 1 products, RW refuge choices always should have a granular insecticide or High rate Poncho® 1250 in the area where the corn rootworm variant exists.
